

# BOOK HEDGEHOG INSTRUCTIONS

**Step 1.** Fold the top right corner of the first page down toward the spine of the book and create a right triangle.

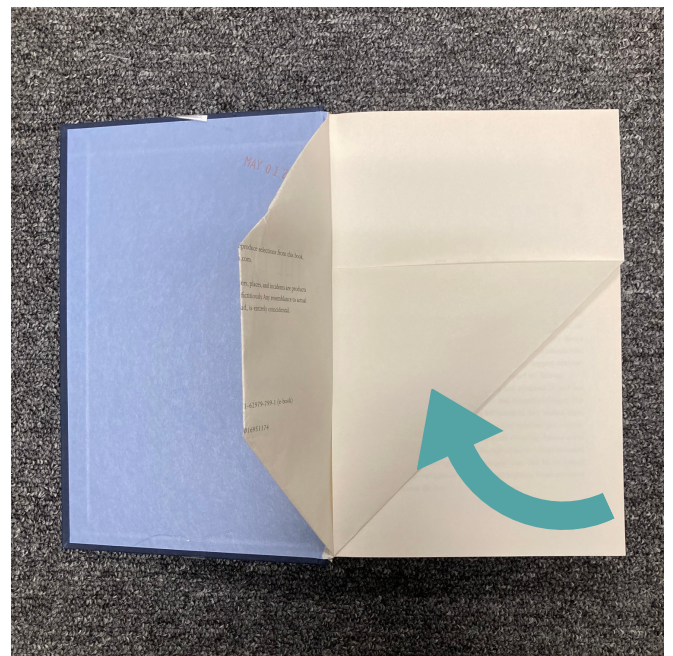

**Step 2.** Fold the page in half, matching the bottom right corner to the spine of the book.

**Step 3.** Fold the bottom right corner up toward the spine of the book and create a right triangle. This page is now done.

**Step 4.** Turn to the next page and repeat the steps in the **opposite** direction: fold the bottom right corner up toward the spine of the book.

**Step 5.** Fold the page in half, matching the top right corner to the spine.

**Step 6.** Fold the top right corner down toward the spine of the book.

**Step 7 and on.** Fold every page of the book, alternating between starting at the top corner and bottom corner. Once you've finished folding every page, glue on button eyes and a button nose, and use paper to decorate it with glasses, hats, clothes, or whatever you'd like! You can also glue paper to the book covers for decoration.

**Tips:** Book hedgehogs take **a long time** to finish. Make sure you take breaks and shake out your hands! This is a great activity to do while watching TV or listening to an audiobook. If you ever forget which corner to fold first, look at the previous folded page and check to see where the smaller triangle is. If it's on the top, you'll start folding the next page on the top. If it's on the bottom, you'll start folding the next page on the bottom.
