The Mortal Instruments: City of Bones" introduces us to Clary Fray, a seemingly ordinary teenager who discovers she is a Shadowhunter, a being that is part angel and part human, destined to hunt demons. Her world is turned upside down when her mother is kidnapped, and she is thrust into a hidden world filled with supernatural beings like vampires, werewolves, and warlocks. It's pretty cool.

In my opinion, "City of Bones" is a thrilling addition to the young adult fantasy genre. Cassandra Clare creates a rich, imaginative world that is both intriguing and complex. The narrative is fast-paced, filled with action, and offers a diverse cast of characters, each with their own secrets and backstories. Personally I think this is a great first book to start and get into science fiction ,action it has a great consistency of virtues and new world possibilities. I loved this book but think the rest of the series gets better and better the more you read on. The blend of urban fantasy with the classic themes of good versus evil and self-discovery makes it a compelling read.

Readers who have a love for fantasy worlds that coexist with our own reality will likely be captivated by "City of Bones." I Recommend this to readers that like to use books and escape to another reality. It's particularly appealing to those who enjoy intricate world-building, magical lore, and a mix of romance and adventure. If you're drawn to tales of hidden societies and young heroes coming into their power, this book is definitely worth your time.
