The story follows a girl names Lulu Shapiro who shows her life for an audience on social media, but behind the screen feels lost. After a scandal that had happened involving a private video, she had began to distance away from her old friends and escaped to Los Angeles nightlife. This is were she meets a girl named Cass who introduced her to a new secretive world. Lulu explores her identity and then begins to question who she truly is.

The book was beautifully written and it offered a fresh and interesting look on what it is light to grow up in the digital age. Lulu's journey is not only about romance, but it is about reclaiming and understanding the power of being seen and online. The story is quiet at times but is deeply resonant for readers who felt pressure to present a version of themselves to the world.

This book was definitely worth reading and I would recommend it to teens and young adults who are interested I'm stories about their identity and the influence of social media. It was not a fast paced plot book but included a rich depth of emotions.
