They'll Never Catch Us follows two sisters living in a town known for its cross country team and its murders and disappearances. About halfway through the book, a girl goes missing from the running team that the two sisters are also members of. Because the sisters are wildly competitive and have had past encounters with the police, many people think it was the sisters who caused the disappearance. Clues start to develop and you're convinced you've figured out who killed the girl but... BOOM! An exciting plot twist occurs that will make you wildly confused, but also surprised!

I would recommend this book to everyone, regardless of what books you usually like. I don't know why no one is talking about how good this book is! I read this book very quickly because I could not put it down. I would recommend this book to anyone between a slightly more mature nine year old all the way up to adult. The only thing that I did not love about this book was that the plot was not truly established until halfway through so I had to use all my patience to get to the most exciting part. If you're okay with an author taking their time to slowly develop the characters and the story, then I would definitely recommend this book.
