Nonfiction

Historical fiction

Other:

The book starts with a teenage girl named Ella going to babysit her cousin. When she gets to their house, she finds that there is a gas leak. She's able to save her two cousins, but sadly, her aunt doesn't make it. The book goes on to with Ella investigating the death, and many things get in her way, one being her brain tumor, which makes the reader not be able to trust her perception of the things happening around her.

I think people should read this book. In my opinion this is a very good book, and it is very well written. The certain way that the author writes the book to get the reader to doubt what the main character is seeing and feeling from her illness is really powerful. It makes the book so interesting and fun to read.

If you are into mystery books with some action, I would definitely recommend that you read Gaslit by Megan Davidhizar. There are so many interesting twists added to the book which make it so fun to read and guess how you think it's going to end. Overall this is a very good book and if you enjoy mystery books, you should definitely give it a try.
