Other:

Heartsick by Kristina Forest is about a highschool senior named Margot. She works at a special clinic that sells a pill that could make people forget their heartbreak. Margot is sad about her ex-boyfriend, Isaac, but things get wild when Isaac shows up at the clinic to take the pill. While there, they accidentally overhear a dangerous secret about the company and have to run away together to safe and tell the truth.

I really liked this book because it mixes a sweet love story with an exciting mystery. The idea of a pill that cures sadness is very cool, and it makes you think about whether it is good or bad to erase your sad memories. Margot and Isaac have great chemistry, and you really want them back together. The story moves very fast, which makes it fun to read, even through the jump from a normal school story to a big action chase happens a bit too quickly.

I definitely recommend this book to anyone whoo likes romance stories with a bit of action and mystery. It is perfect for teenagers who enjoy books about growing up, first love, and big adventures. Overall, it is fun and interesting book that shows why our feelings, even the sad ones, are important.
