"Death in the Jungle" by Candace Fleming, explains how rough life has been in the 1900s in the US and Jonestown, Guyana, South America. It mostly explains the trauma the people in Jonestown Jim Jones had caused. There were three teens who were named Brian, Tommy, and Davis, who all tried to escape Jonestown and go to Venezuela.

If I have to be honest, "Death in the Jungle" was one of the most unforgettable books I've read. It explains a major and a very important historic event. I really liked the book and if I would read this again one day, I definitely would. I think people should also read this book because they could understand important moments that happened in the past that maybe could impact the future. I would say someone who's into nonfiction history books should read this book. In my opinion, it's an 8/10 book.
