Nonfiction

Historical fiction

Other:

Spacewalking With You follows the daily life of Kobayashi, a high school student who seems to struggle with everyday life, such as understanding concepts in school, or knowing how to perform a certain task at his part-time job. It wasn't until Kobayashi met Uno, a transfer student who seems to have the same difficulties as him, that he learned to navigate life better. What was it that Kobayashi learned from Uno? It turns out that Uno developed a brilliant system in his personal notebook that guides him through everyday life.

Spacewalking With You is a very relatable book that deals heavily with students and learning environments. The book emphasizes how different people thrive when learning in different ways, for example, most characters in the book are completely content with the traditional school learning system; however, some characters, like Kobayashi, require a different approach to effectively learn. This book is definitely a great read as it introduces a perspective on how this world isn't tailored to everyone's needs. Anyone who enjoys slice-of-life with a touch of drama will enjoy this book.
